

CONSTRUCTION: BACKHOE RENTAL BUSINESS

SUMMARY

As investment in public infrastructure and building in Southern California continues to grow, this company is naturally in a good place to grow as well. This is a high-maintained business that has earnings of \$316k on \$430k in sales.

This construction rental business has a fleet of John Deere Backhoes and accessories. The company is more of a subcontractor since equipment is delivered with an operator on a daily, weekly or monthly basis. The company is well known for its timeliness and exceptional service. Major utility companies and residential builders rely on this company for the niche service that it offers.

This can be a passive income business or run from a home office. The current inventory of vehicles and resources will allow a new owner to double or even triple the revenues before having to make any additional capital investments.

The owner is selling to move out of state but is willing to stay on for an extended time during the transition period.
